PERSONAL INFORMATION

Citizenship: **United States**
Languages: **English, Tamil, Hindi, French**

SKILLS

- Python, SQL, scikit-learn, pandas, seaborn, matplotlib
- Power BI, Excel (Advanced), Google Sheets, ChatGPT API
- Logistic Regression, Classification, Data Cleaning, Predictive Modeling
- GitHub, Google Colab, Jupyter Notebooks
- Business Communication, Reporting Automation, Team Collaboration

EXPERIENCE

BUSINESS ANALYST INTERN at *Highlands Consulting (Sacramento, CA).*
June 2024 to Sept 2024

- Developed complex Excel budget models to calculate FEMA reimbursements for COVID-19 damages across California.
- Consolidated thousands of invoices into a master data sheet; collaborated with government officials to resolve reimbursement discrepancies.
- Analyzed over 200 FEMA appeals and presented insights on prepositioned costs in a firmwide PowerPoint briefing.
- Gained experience in deadline-driven, high-pressure environments and conflict resolution within government settings.

FINANCIAL ANALYST INTERN at *Kanikalamavari Goshala (India).*
June 2022 to Aug 2022

- Developed financial models for budgeting and forecasting; built Excel tools to monitor KPIs and spending on agricultural inputs.
- Analyzed balance sheets, income statements, and cash flow reports to evaluate financial health.
- Supported investment decisions by forecasting market and economic trends using internal farm data.

EDUCATION

BACHELOR OF SCIENCE IN MANAGERIAL ECONOMICS. *Univ. of California, Davis*
June 2025

- A rigorous program blending economics, finance, and quantitative analysis to understand market behavior and guide business decision-making.
- Emphasis on microeconomic theory, econometrics, financial markets, and risk management with practical exposure to forecasting, modeling, and data interpretation.
- Relevant coursework: Intermediate Microeconomics, Econometrics, Financial Markets, Futures and Options, Economic Development, Business Writing.

ADDITIONAL EDUCATION

AI AND BUSINESS INTELLIGENCE PROJECT PORTFOLIO. *Self-directed.*
2024–2025

- Completed a capstone series of practical projects applying Python, Power BI, and generative AI in real-world business use cases:
- Built a **customer churn prediction model** using logistic regression in Python; designed an interactive **KPI dashboard in Power BI**; and created an automated executive **reporting assistant using ChatGPT and Google Sheets**.

GOOGLE DATA ANALYTICS PROFESSIONAL CERTIFICATE. *Coursera.* **2025**

- Hands-on training in spreadsheets, SQL, data visualization, R programming, and analytical thinking using real-world business datasets.

PYTHON FOR DATA SCIENCE AND AI. *IBM / Coursera.* **2025**

- Focused on pandas, numpy, data wrangling, and exploratory analysis using Jupyter Notebooks and scikit-learn.

SUPERVISED MACHINE LEARNING. *Coursera.* **2025**

- Core ML techniques including logistic regression, performance evaluation, and model deployment for classification tasks.

AI FOR EVERYONE. *Andrew Ng / Coursera.* **2025**

- Introduction to ethical and practical applications of AI in business workflows. Emphasis on how non-engineers can use AI for strategic decision-making.

POWER BI DESKTOP AND DAX FOUNDATIONS. *Microsoft Learn.* **2025**

- Data modeling, DAX calculations, interactive dashboard development, and drill-down KPI visualization.

TABLEAU FUNDAMENTALS. *Tableau Public.* **2025**

- Building interactive dashboards, storyboards, and filtering mechanisms for business storytelling.
